Böttcherin Ventana

Cleaning Agent for Rollers and Blankets

Cleaning agent for Rollers and Blankets in Sheet Fed Printing

Especially appropriated for the use in automatic cleaning devices

- Removes paper coating and paper coating edges at the non-printing area
- Excellent flow properties in the collecting pans of the cleaning system
- Reduced clogging of the brush roller
- Manual post washing of the paper coating edges on the blanket is no longer necessary
- Very fast drying of the blanket
- Removes properly the dirt build-up at the edges
- Reduced solvent consumption
- No residues of solvent after post cleaning with water
- based on aliphatic hydrocarbons
- flash point > 62 °C, free of aromatics and corrosion inhibited
- excellent cleaning of the ink rollers

The program of the washing device must be adjusted according to the solvent.

In case of manual cleaning the Böttcherin Ventana can be used pure or mixed with water.

Remove the dissolved dirt with sufficient water.

Böttcherin Ventana fulfills the test criteria and requirements of the press manufacturers.

- 20 liter can
- 200 liter drum
- 1.000 liter container

Böttcherin Ventana is classified and marked in accordance with EC-Directive 1999/45/EC - in its latest version. Böttcherin Ventana is not a dangerous good in the sense of national and international transport regulation.
