Böttcherin 6003

Cleaning Agent for Rollers and Blankets

Cleaning agent for cleaning printing blankets and rollers. Particularly suitable for automatic roller and blanket cleaning units in sheet-fed printing.

- based on aliphatic hydrocarbons
- flash point > 62 °C
- water miscible, free of aromatics, corrosion inhibited
- increased cleaning effect
- due to highly effective emulsifying system, increased wetting of the surfaces
- to be removed with water, leaving no residue
- slow evaporation
- very good draining behaviour in the pipes and reservoirs of blanket washing units
- therefore enlarged cleaning intervals of the washing unit

We recommend setting the washing system to optimise the cleaning cycle and Böttcherin 6003 performance. In case of manual cleaning, use Böttcherin 6003 undiluted or mixed with water. Apply the wash to the blanket or roller, then finally rinse with water until all ink and cleaning agent residues have been removed.

Follow the automatic washing system manufacturers' operating instructions. If manual cleaning with a hand rag, wear protective gloves during application, follow all press safety instructions.

Böttcherin 6003 is approved by Heidelberg, manroland, Koenig & Bauer and Baldwin for use in their machines.

Böttcher *Systems*

🔵 20 litre can

🔵 200 litre drum

🔵 1000 litre container

Böttcherin 6003 classified and marked in accordance with EC - Directive 1999/45/EC - in its latest version. Böttcherin 6003 is not a dangerous good in the sense of national and international transport regulations.
