

# Böttcherin Aqualux

## Water Additive for Automatic Cleaning Systems

Böttcherin Aqualux is added to the water tanks in the automatic roller and blanket washing systems in sheet-fed presses; it can also be premixed with water for washing with a cloth by hand.

*Application*

- speeds final cleaning in washing system
- prevents calcium residues in the water basin
- may not be used with filtration systems
- reduces surface tension of the cleaning water resulting thus in a more even spread on the blanket and roller
- leaves less water around the blanket gaps
- helps keep wash-up drip trays and return pipes clean
- keeps the nozzles of blanket and roller wash devices clean, minimising maintenance down time
- removes remaining ink and solvent residues from rollers at the end of wash-up cycle
- improves cleaning performance on cloth type blanket wash systems
- results in a dry and clean surface on the blanket and on the rollers

*Features*

Böttcherin Aqualux is added to the water in a concentration of 5 % by volume.  
Böttcherin Aqualux must be kept free from frost when in storage.

*Note*

-  5 litre can
-  10 litre can
-  20 litre can

*Package*

Böttcherin Aqualux is classified according to EC-Directive 1999/45/EC - in its latest version and does not need to be marked.

*Marking*
