

---

🌍 For the cleaning of ink circulation systems and chamber blade use with water in relation 1:9. Acting time 5 to 10 minutes, then rinse with water approx. 3 minutes.

🌍 Use with 50% in water or even purely concentrated if the inks on the anilox rollers are dried out and then rinse with water.

The cleaning of the cells on the ceramic or anilox roller contributes to a constantly even printing quality since the ink dosage remains equal. No loss of productivity and quality.

🌍 Wear suitable protective gloves and safety eyewear during the use!

---

*Note*

Böttcherin Velvet is available in the following packaging sizes:

25L-can → 804965

200L-drum → 804966

1000L-container (IBC) → 804967
