

Electronic pH Meter

For Measuring pH Value of Fountain Solution

Part number: 803025

- sensor, with automatic temperature compensation
- sensor that will not break easily
- no requirement to store sensor in fluid
- fast response
- stable sensitivity characteristic
- only a small amount of fountain solution required
- automatic 2-point-and 3-point calibration
- calibration errors announced on display
- large, easy-to-read display
- auto power-off, if not used
- waterproof
