

# BöttcherFount H-2003 S

## Fountain Solution Additive for Alcohol Reduction

BöttcherFount H-2003 S is a fountain solution additive for heatset and continuous form printing, particularly for strong alcohol reduction and alcohol-free printing. Particularly for soft water.

*Application*

- standard dosage 2 - 3 %
- for alcohol reduction, IPA-percentage below 5 % or for IPA-free printing
- very stable ink-/water balance
- reduced and stable water pick-up of the ink, therefore higher ink density obtained
- fast restarts and stable printing for long runs
- for conventional and continuous dampening systems
- for water hardness 0 - 5° dH (total hardness)
- pH-value 4.8 - 5.2 (according to water hardness)
- reduced calcium deposits on ink rollers
- minimises build-up of paper dust and ink on the blanket
- reduced ink feedback into the dampening system
- reduced ink misting
- effective prevention of foam
- increased conductivity per % input: 650  $\mu$ S/cm
- density 1.13 (kg/l)

*Features*

Before applying BöttcherFount H-2003 S, the fountain system must be completely emptied and cleaned thoroughly, preferably with BöttcherPro Hydroclean.

The more the Isopropyl alcohol content is reduced, ink feedback and debris will increase and accumulate in the fount circulation system. Therefore, we recommend the fount solution to be changed regularly, e. g. every two weeks.

*Note*

200 kg container

Package

BöttcherFount H-2003 S is classified and marked in accordance with EC-Directive 1999/45/EC – in its latest version. BöttcherFount H-2003 S is not a dangerous good in the sense of national and international transport regulations.
