

BöttcherTex Maxima

Cleaning web for automatic blanket washing units
(mini rolls for Heidelberger Druckmaschinen)

Application

-  **More cloth meters on a roll in comparison to other qualities.** Therefore higher change intervals of mini rollers on the printing unit.
-  extreme resistance against tearing, abrasion and picking → avoids fibre residues on the blanket.
-  Cloth remains dimensionally stable, also in transverse direction
-  high absorbency, soaking up the full volume of cleaning agent
-  improved capacity of capillary conduction
-  optimised solvent stability
-  continuously high printing quality after cleaning
-  long-term-tested
-  manufacturing technology with high pressure water-jet, without bonding agents or adhesives

Features

Mini rolls for immediate use are available for the following presses:

Press	Cloth width (mm)	Part number
SM / GTO 52	540	800663
SM 74	765	800664
SM 74 CD / XL 75	765	800665
SM 105 XL	1.075	800666

Maxi rolls with a length of 500 m for self-winding of mini rolls:

Press	Cloth width (mm)	Part number
KBA RA 162	1.660	800714

Other roll dimensions are available.
