

Rotogravure

ESA-impression roller Packaging printing

Compound	Shore A
600	90
601	90
660	80
661	80
652	90
690	90

- Impression rollers for Printing with Electrostatic Printing Assistance
- Indirect Charging, standard ESA-Emission electrode (600 90; 660 80; 690 90)
- Indirect Charging with short or standard ESA-Emission electrode (601 90; 661 80)
- Core charging systems (652 90)
- Charging with ESA-Brushelectrodes (661 80, 601 90)

Application

- Coverings for all common Charging systems
- Constant electrical properties
- Precise geometry

Features

- 2 standard grades of hardness; additional grades available on request
 - to cut back to any smaller formats (600 90; 660 80)
 - limited possibility to cut back on smaller formats (601 90; 661 80)
- Especially for production of folded boxes (690 90)

Note

- Excellent reproducibility for consistent job re-runs stable printing process
- Excellent operating characteristic long servicelife

Benefits
