

# BöttcherTex **Winding station**

## Motor driven winding station

---

Motor driven winding station for self-manufacturing of mini rolls from 500 m maxi rolls.

*Application*

- 
- CE-approval
  - Strong reduction of cost for the customer due to self-manufacturing
  - The self-manufactured mini rolls can immediately be used in the automatic washing device
  - For cloth width of max. 1090 mm, other dimensions on request
  - Dimensions: 130 x 45 x 105 cm (L x W x H)
  - Tension: 230 V
  - The manual gives detailed information about the proper use of the winding station

*Features*

- 
- Connecting cable 10 m (with german plug)
  - Bottom plate for storage of mini rolls and aluminium cores
  - pivot center for Heidelberg Speedmaster machines (see photos)
  - cutting knife
  - manual

*Delivery contents*

Aluminium cores for SM 52, SM 74, SM 102 and SM 105 XL have to be ordered separately.

The manufacturing of pivot centers for other printing machines is possible on request.

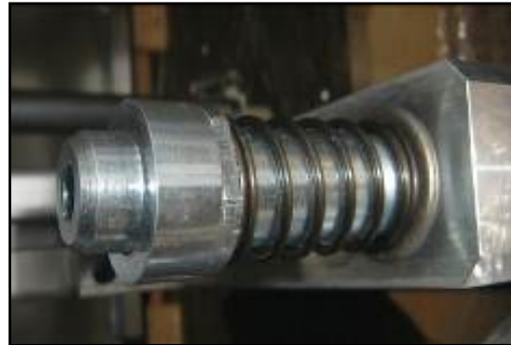

On our homepage you will find a movie about our winding station. It demonstrates the easy handling.

You find it via: <http://www.boettcher.de/Boettcher-Website/en/Products/Products/Cleaning-web.html>
